

**A Natural Blend of Beauty and Strength**

Custom made and installed, Metals USA awnings and door hoods represent form and function at their best

Metals USA Awnings have a natural venting action to prevent the build-up of hot air against windows. The unique “pan and cover” construction helps keep rain, snow and debris from penetrating, without trapping heated air underneath. A soft “halo light” filters into your home instead of dark shadows associated with other awnings.

Unlike fabric awnings, Metals USA Awnings won’t stretch or tear, and don’t need to be taken down for the winter.

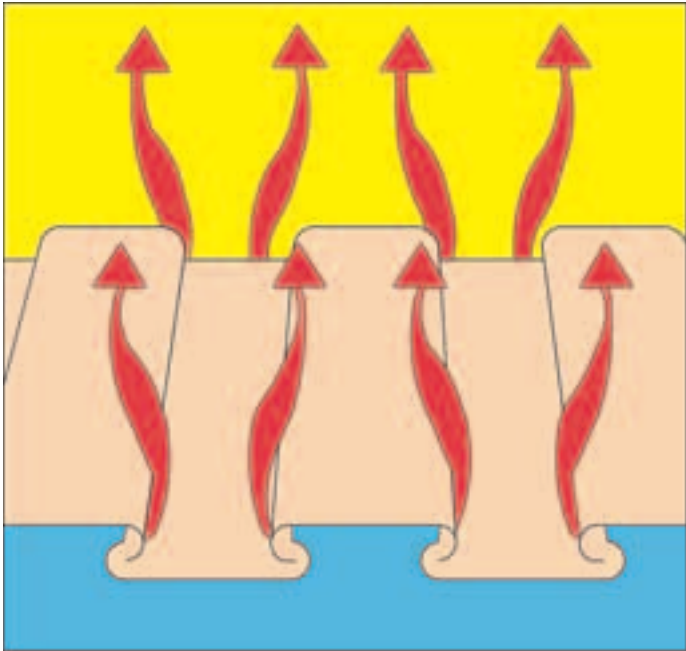

While the top surface is available in a wide variety of styles and colors, the underside is always a crisp, clear white. No mechanical fasteners are exposed and the overall appearance is trim and neat.

The panels are chemically cleaned, conversion coated, and painted with a baked epoxy primer before a high quality polyester enamel paint is applied. The end result is a minimum maintenance surface that retains its good looks.

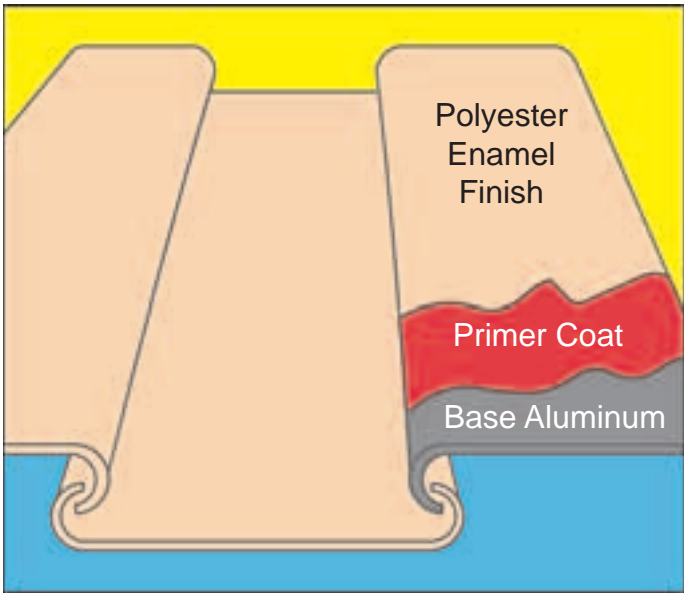

Awnings and door hoods are engineered to meet your local building codes.

Protected against peeling, blistering, flaking, splitting, rusting, chipping or cracking that’s backed by a 10 year prorated limited lifetime warranty. For complete warranty information, ask your Metals USA Dealer for a copy of the awning, door hood and patio awnings warranty.

Consult your dealer for information on the full line of Metals USA exterior products for your home.

## In Styles for Your Home

Awnings and matching Door Hoods are a decorative addition to any home.

Awnings also work to reduce glare and heat from the sun. In addition to a more energy efficient home, awnings become a protective agent, keeping your interior furnishings from the damaging rays of direct sunlight.

Available in a variety of designer styles and colors, awnings can accommodate any architectural design.

**Door Hoods** provide a warm welcome and a sheltered entrance all year long. Beautiful and practical, door hoods will protect your entry way from rain, sleet and snow, as well as providing solar control.

**Patio Awnings** are perfect for parties, cook-outs, and other entertaining activities. Patio awnings add shelter and shade to outdoor living. Patio awnings are custom built for your home to suit your space.

**Panorama's** horizontal lines complement sleek, modern architecture. Furthermore, panorama's overlapping design won't block your view.
