

Bay and Bow Windows

With OKNA's Bay and Bow Windows we are pleased to provide breakthrough products which offer a myriad of options to seamlessly blend with any decor to enhance the beauty of your home. Let OKNA Windows enhance your view with beauty, elegance, and performance.

*“A **bow window** is a curved bay window. Bow windows are designed to create space by projecting beyond the exterior wall of a building, and to provide a wider view of the garden or street outside and typically combine four or more casement windows, which join together to form an arch. Bow windows first appeared in the eighteenth century in the United Kingdom, (and in the Federal period in the United States).”*

Illustrated Architecture Dictionary

Bow Window

Unique features of OKNA Bow Windows:

- Standard Two Inch Insulated Head and Seat Board with Furniture Grade Birch Veneer. (Oak finish optional)
- Standard Rod and Cable System. (Rod and Chain System optional)

OKNA Bow Windows are comprised of all the characteristics of exceptional window design, meticulous attention to preservation of the traditional esthetics, implementation of modern functionality and unparalleled energy efficiency.

We offer Bow Windows in many custom configurations containing casement, picture, and double hung windows.

“Bay windows became a hugely popular feature of residential Victorian architecture in the British Isles from about the 1870s and hold a continuous appeal up to this day. They are used to increase the flow of natural light into a building, thereby also making a room appear larger, and to provide views of the outside which would be unavailable with an ordinary flat window. They can be found in terraced houses, semi and detached houses as well as in blocks of flats.”

Illustrated Architecture Dictionary

Bay Window

OKNA Bay Windows are one of the most popular ways to give your room more light and space without adding square footage. These windows lend charm and beauty to any room. They are ideal for creating eating nooks, bath surrounds, and mini greenhouses.

We offer Bay Windows in many custom configurations containing casement, picture, and double hung windows.

Unique features of OKNA Bay Windows:

- Furniture Grade Veneer used on our Head and Seat Board. Elegant Birch finish is standard but we also offer optional Traditional Oak Finish.
- Water Penetration Barrier Below Each Window and Mullion.
- Silicone Free Interior and Exterior to improve esthetics.

Garden Window Features

- Fully welded, rigid PVC vinyl frame for greater strength and stability.
- Aluminum and steel reinforcements in the front mullion.
- The multi-point locking system provides a tighter seal and added security.
- Twin sealing, fully screened, operating casements with external glazing for improved weather protection.
- Glass shelf with steel support system is available for units over 42 inches.
- The window is shipped completely assembled for easy installation.

Grids

Looking for a stunning design to instantly set your home apart both inside and out?

OKNA Windows offers a range of grid configurations and styles to enhance the look of your home.

GBG (Grids between glass) consist of aluminum bars sealed in the insulating airspace between the two panes of glass. Because the interior and exterior glass surfaces are not affected, cleaning your windows is a much easier task. GBG grids on two tone windows are available with matching interior and exterior colors. Custom colors are not available on GBG.

SDL (Simulated Divided Light), permanent interior and exterior grids will provide a truly authentic look. Interior grids are available in a Euro-White color or Wood Laminate. External grids are available in Euro-White or colors to match products exterior.

ThruVision PLUS® Screen

Industry Average Screen

ThruVision PLUS®
Standard Screen

ThruVision Plus® is our fiberglass improved visibility screen. This product does for windows and doors what high-definition technology has done for television viewing: it improves the view by making it sharper and more vivid.

Color Options

OKNA Windows offers three beautiful internal laminates in addition to the standard Euro-White to give your home a distinct look and enhance its curb appeal. You can also special order custom exterior colors from a virtually unlimited selection of paints. Our paints are environmentally safe and durable, giving your exterior a vibrant and long-lasting color finish.

Superior Construction

No other manufacturer has a greater commitment to quality than OKNA Windows. Our new, redesign Bay and Bow Windows have incorporated the latest innovation in fenestration technology to provide a window that is energy efficient, functional, and much more beautiful.

1. Two inch Insulated Head and Seat Board with Furniture Grade Veneer and Standard 1 1/4 inch jamb.
2. Water Penetration Barrier Below Each Window and Mullion.
3. Exterior drip cap.
4. Standard Foam Insulated Mullions with Threaded Rod.

HeatSeal™ Heat Reflective Coatings consist of microscopically thin layers of metal & metal oxide that act like an optical filter.

- HeatSeal™ spectrally selective coating provides minimal loss of visible light.
- The most harmful radiation in sunlight are the ultraviolet (UV) rays, which cause fading and degradation of materials.
- Heat Shield™ glass significantly reduces unwanted heat gain and heat loss. During warm and cold weather, our Heat Shield™ technology increases comfort in your home.
